

**FOR IMMEDIATE RELEASE****Yaskawa Solectria Solar to Exhibit at RE+ 2022**

Showcasing our "Made in the USA" inverters at Booth #2220

---

**Lawrence, MA, September 13, 2022** - Yaskawa Solectria Solar will exhibit at the RE+ Expo, September 20 - 22, 2022, at the Anaheim Convention Center in Anaheim, CA. Formerly SPI, ESI, and Smart Energy Week, it is the largest and most comprehensive event in North America for the clean energy industry. Visitors to booth #2220 can expect to see the company's complete product line of inverters ranging from 25kW to 250kW, string combiners and web-based monitoring for all size solar systems.

All of Solectria's XGI three-phase commercial and utility inverters are "Made in the USA" with global components at the Yaskawa America factory in Buffalo Grove, IL and are the only PV inverters designed and manufactured in the USA. Meeting the Federal Acquisition Regulations (FAR) definitions of a Commercial Off-The-Shelf (COTS) item, this also qualifies our Solectria inverters as domestic end products, compliant with the Buy American Act (BAA). Furthermore, Solectria's XGI inverters enable our customers to qualify for the Domestic Content Bonus Credit under the new Inflation Reduction Act (IRA) provisions.

*"Yaskawa Solectria Solar is excited and proud to be an exhibitor at the 2022 event after the 3-year hiatus" said Mark Goodreau, General Manager at Yaskawa Solectria Solar. "We look forward to connecting with our industry colleagues, sharing our USA manufactured inverters with you, and celebrating the historic passage of the IRA."*

**Booth Highlights:**

[SOLECTRIA® XGI 1500-250 Utility String Inverters](#) - The XGI 1500-250 and XGI 1500-200 feature SiC technology, high power and high efficiency, placing them at the top end of the utility-scale string inverters in the market.

Learn about [Solectria's in-person and on-line training](#) for our XGI 1500 inverters, to become an expert in commissioning and troubleshooting in the field.

**About Yaskawa Solectria Solar**

Yaskawa Solectria Solar is a wholly-owned subsidiary of Yaskawa America, Inc. and the largest inverter manufacturer based in the USA, with headquarters in Lawrence, MA, and world-class production facilities in Buffalo Grove, IL and Oak Creek, WI. Solectria's products include inverters ranging from 25kW to 250kW, string combiners and web-based monitoring for all size solar systems. All of Solectria's three-phase utility inverters are made in the USA with global components and meet the Federal Acquisition Regulations (FAR) definitions of a Commercial Off-The-Shelf (COTS) item. This also qualifies our Solectria inverters as domestic end products, compliant with the Buy American Act (BAA). Solectria is backed by Yaskawa, with over 100 years of power electronics and inverter experience and continues to exceed expectations and provide new innovations in the marketplace.
